

Halo SITEGUARD – Wireless Barrier System

REDUCE OR ELIMINATE GUARD COSTS !

No Site Power ?

No problem.

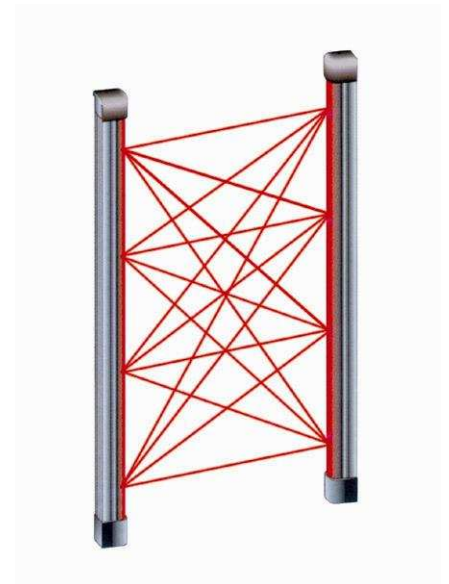

You don't need power...

Site Guard too expensive ?

No problem.

You don't need a static guard...

- The Halo SITEGUARD wireless barrier is a unique Perimeter Protection System that alerts you when someone is trespassing on your premises.
- The Tower units are approximately 1 metre tall.
- Two SITEGUARD Tower Units are aligned up to 40 metres apart and multiple infra- red beams reliably detect intruder movement between the Tower Units.
- Intruder movement triggers a text (SMS) alert to your mobile (cell) phone AND/OR our monitoring centre, where the appropriate response is taken.
- What makes the Halo Siteguard Wireless Barrier System so unique is that is battery powered. Absolutely no hard wiring is required.
- **AND** Battery life is up to 1 year.

Halo SITEGUARD features and benefits:

- The Halo Wireless Barrier System can run without power for up to 1 year ! (no wires).
- SMS (text message) sent to mobile (cell) phone on intruder alert.
- Keyswitch enable / disable.
- Barriers can be installed in hours.
- Quad IR (infrared) beams reduce false alerts.
- Tamper Proof Design.
- 40 metres between transmitter and receiver.
- Possibility of Covert Install depending on site layout.
- Reduce or eliminate manned guard costs.
- Reduce or eliminate mobile patrol costs.
- Rugged weather resistant design.
