

### Halo SiteCAM HD

Halo SiteCAM HD is designed to record evidence-grade audio & video in areas where electrical power is unavailable.

The covert Halo SiteCAM HD records surveillance video, audio, and pictures day or night, rain or snow for 2-3 weeks between battery changes. It can even deliver 2-months service if the optional external battery-pack is used. It doesn't require an external power source. The Halo SiteCAM HD will capture all the action day or night complete with a time, date, moon phase, and temperature stamp on every video segment. Record crystal clear surveillance video with audio or take fast-action snapshots to keep your property safe, day or night, indoors or out.

#### What it does:

- **Records video & audio in all weather**
- **Battery powered -Does not require electricity connection**
- **Audio & Video stored on removable memory-card**
- **Dual cameras: Colour & B&W for perfect Day & Night images**
- **Colour 8 Megapixel camera for Hi-Def imaging**
- **B&W camera is 2 Megapixel for night clarity**
- **Infrared motion sensor to allow system capture images only when needed.**
- **15 Metre covert night-vision LEDs**

This customisable Digital Video/Infrared Camera Records Day or Night when motion is detected. It may be programmed to record fast-action snapshots or video segments. Choose video segments and adjust the unit to record 5 to 300 second video segments depending on your surveillance needs. Get perfect surveillance video day or night with an infrared sensor that captures night vision video up to 15 metres away with its 54 IR emitters.

#### Simple Plug & Play Format and Crystal Clear Viewing:

Benefitting from H.264 video compression (MPEG 4) it is extremely easy to watch the video as it's in MPEG 4 format, which means all you have to do it plug & play to your PC or laptop. With this 1024 x 720 High Definition digital video recording you get high quality video playback that lets you see everything perfectly.

### **100% Weatherproof Camera Designed For Outdoor Use:**

This system is designed for outdoor use –but may be used indoors if required, of course. Place it in a tree or on some inconspicuous location and leave it to work unattended. The motion-activated recording will capture all the action onto a removable SD card, making it easy to quickly review footage on any TV or monitor. Capture clear video or snapshots of any intruders for the ultimate in site -security and surveillance.

### **Options:**

- Camouflage attachment to blend with trees
- External Li-ion battery to deliver two-months service life
- Locking system to prevent theft if unit is discovered
