

# The Ultimate Level of Security

**HALO**  
SECURITY

# Complete control of keys

Never worry about a lost or stolen key ever again

# The Ultimate Level of key security:

- Instantly 'cancel' lost/stolen keys
- Remove User access rights as required
- Only allow User access at certain times
- One Key per User (No more key bunches)
- Optional Key re-validation periods (Key operates for pre-set time periods only)
- Full Audit trail (Time/date of User access)
- Fully wireless
- Water resistant
- On-key indicators for User information

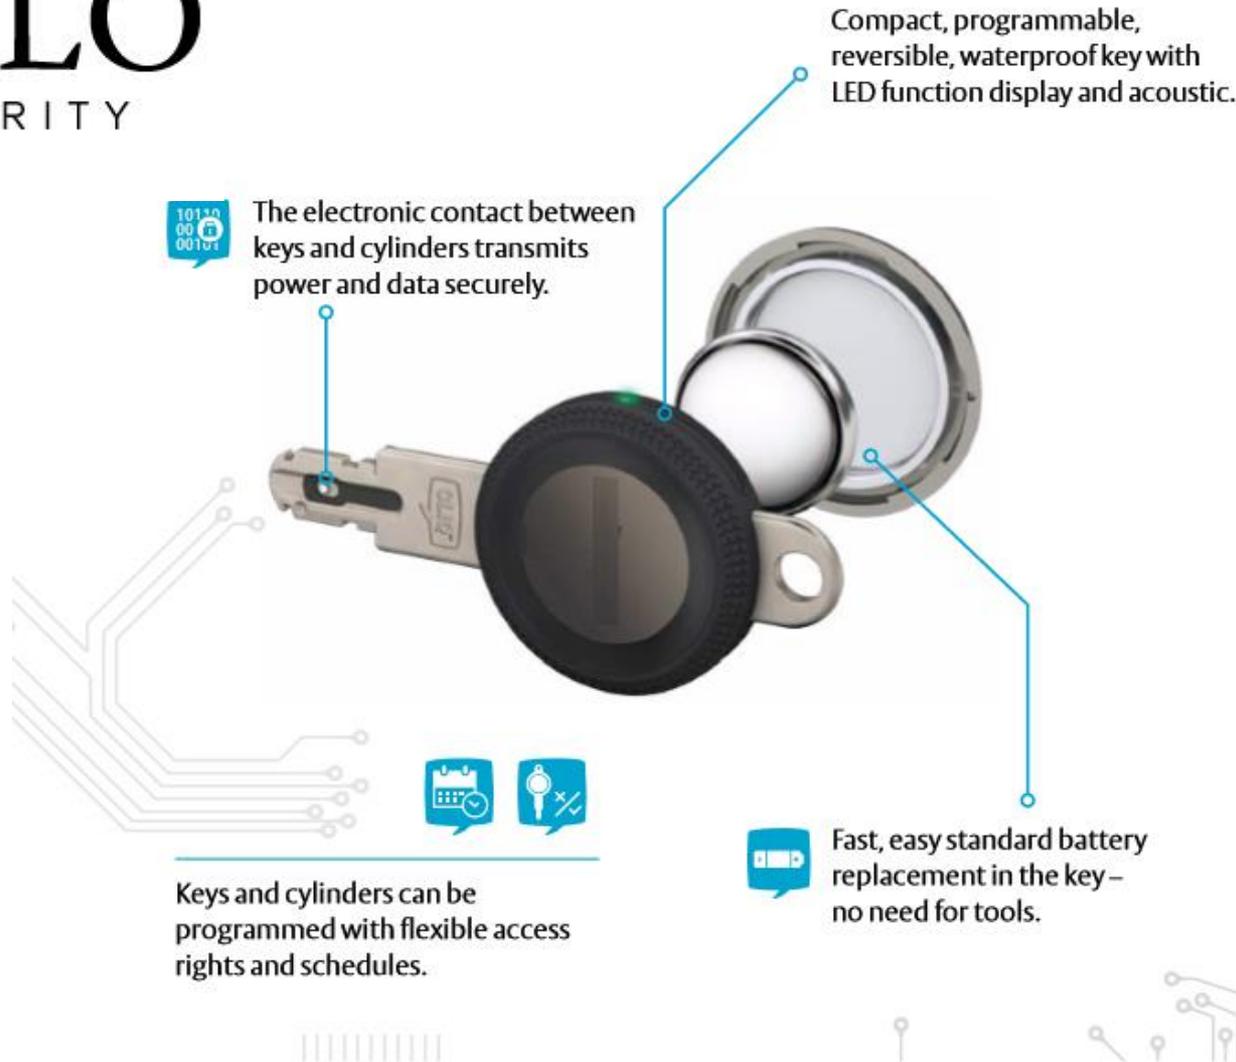

# The Ultimate Level of Security

- Retro-fit to any door
- Unauthorised Alarm: Alerts to access attempts
- No wires –Just install like a normal cylinder
- Not just door locks–Padlocks, CamLocks, Key Switches

# HALO

SECURITY

The electronic contact between keys and cylinders transmits power and data securely.

Compact, programmable, reversible, waterproof key with LED function display and acoustic.

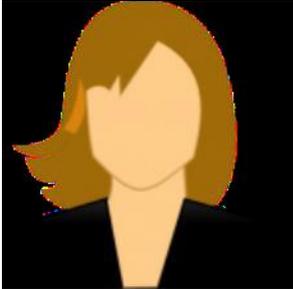

Fast, easy standard battery replacement in the key - no need for tools.

Keys and cylinders can be programmed with flexible access rights and schedules.

# The Ultimate Level of Security

Shift Starts

Key Validated & Programmed for the day

Normal Operation  
At work

Shift Ends  
Key becomes un-usable

# The Ultimate Level of key Security:

Cloud based software –Access via web browser

- Secure login with admin keys
- Assign locks to groups for easy Admin i.e. External doors
- Individual user key access profile or create groups i.e. Cleaners
- Once setup, Simple for Management to use

- Keys can be updated anytime
- Enforce time and attendance policy through re-validation of keys
- Staff are no longer looking for bunches of keys
- Reduced cost on cylinder replacements due to lost keys
